

GET READY

- 1 Each player draws one card and puts it **face-down** in front of them. **IMPORTANT: Do not look at your card yet!**
- 2 Before the round starts, one player selects which color will be used for that round, purple or orange. **All players must use that color.** Players take turns choosing the color for each round.
- 3 Turn your card so that the chosen color faces you.

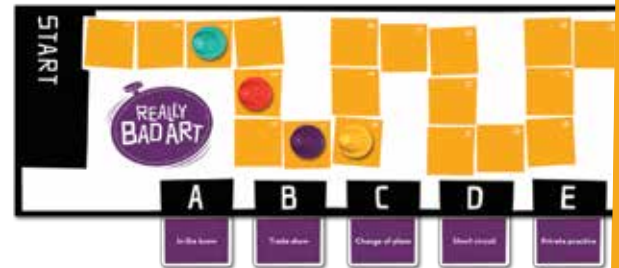

THIS ROUND,
EVERYONE PLAY THE
PURPLE SIDE!

The cards have a purple side and an orange side, each with its own phrase.

HOW TO PLAY

- 1 When everyone is ready, press the button on the timer. You will hear three **BEEPS**, then a **DING**.
- 2 When you hear the **DING**, look at the other side of your card, then place it back **face-down** on the table **without any other players seeing it**. Make a drawing representing the phrase. **Be quick, you only have six seconds!** When the timer **BUZZES**, players must immediately stop drawing and put their pencils down.
- 3 The player who picked the card color then does the following steps:
 - Collect all of the cards, keeping them face-down.
 - Draw a card from the card box (a “decoy” card), add it to the cards collected from the players, and mix them all together.
 - Turn the cards face-up. Assign a letter to each card by tucking it under the edge of the game board, as shown. You should only see the color selected for this round.
 - Arrange all of the players’ drawings in the center of the table. It does NOT matter if you see which players drew which drawings. Because of the decoy card, there should be one fewer drawing than there are cards.

- 4 Every player places their guessing tokens **face-down** on the drawings (including their own) to guess which phrases they match. Place only one guessing token per drawing. Do NOT reveal or discuss your guesses.
- 5 One by one, each player turns over their token on their drawing to show the correct letter. Then all of the tokens on that drawing are turned over and points are scored. (See the **SCORING** section on the back page.)
- 6 Discard the cards to the back of the card box. Each player draws a new card, face-down, and a new round starts. (See the **GET READY** section.) Keep playing until a player reaches the Finish space.
